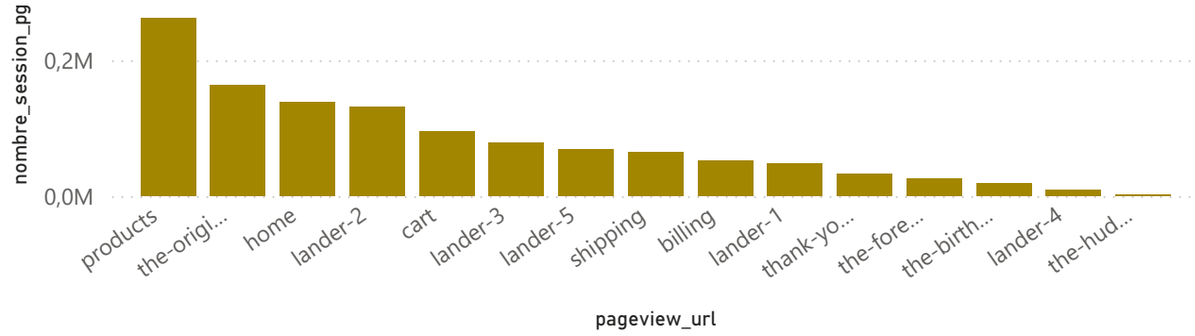
Top pages by Sessions



Key insights & Recommendations

- Total sessions declined in 2015, consistent with the drop in revenue, indicating a **loss of traffic momentum**
- Significant drop-off between product view (55%) and cart (20%), suggesting **low purchase intent or friction in the buying journey**. The company should optimize the product-to-cart experience
- Traffic is concentrated on a few pages, indicating limited and non-optimized user navigation. Improving **site structure and navigation flow** could enhance engagement.
- Product performance is highly skewed, with **"The Original Mr Fuzzy"** driving most

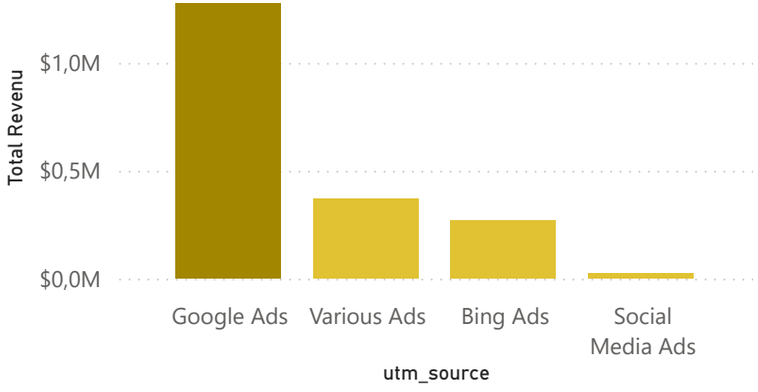
Revenu by Channel



Key insights & Recommendations

- Maven Fuzzy Factory is heavily dependent on **"The Original Mr Fuzzy"**, creating a product concentration risk. The company should replicate its success across other products.
- Revenue declined in 2015 after strong growth since 2013, indicating a **slowdown** in demand or marketing performance.
- **Profit margin** remains stable (60%), showing effective cost control and that the issue lies primarily on the **revenue side**. The priority should be to increase sales rather than reduce costs.
- **Google Ads** is the primary revenue driver, significantly outperforming other channels. The company should increase investment in Google Ads while optimizing ROI.
